

## Speaker: Thomas Bogenschütz

### Profile

---

Thomas Bogenschütz has worked at TDM Systems as CAM Product Manager since 2013 and is responsible for the following areas: CAM interfaces, NX CAM, 3DEXPERINCE, Vericut, GibbsCAM, EDGECAM and IndexVirtualMachine. In his days as a mechanical engineer, he gained experience in CNC production at a leading textile machine manufacturer. Before moving to the CAM department there, he spent two years at the machine builder's American plant and updated the shopfloor in terms of processes and autonomy including unmanned shift production. Thomas Bogenschütz therefore possesses a wealth of knowledge on production and CAM, and drives forward the CAM interface product portfolio at TDM Systems.

### Title

---

- CAM Interfaces as Productivity Engines – the Latest from the CAM Field and Interesting Insights into the Benefit and Know-How of Interfaces

### Focus/ Target Group

---

- New customers
- Existing customers
- Users (in CAM field)
- Decision makers (in CAM field)

### Duration

---

- 60 minutes

## Speaker: Thomas Bogenschütz

### Focal Points/ Contents

---

CAM interfaces are real productivity engines. Hear Thomas Bogenschütz speak about everything you need to know about using CAM interfaces:

- Scope of the CAM interface
- Features and functions of the interfaces
- Maintenance and development of the interfaces
- CAM interfaces at TDM Global Line
- How to use multitools in the CAM interfaces
