

Speaker: Volker Schwegler

Profile

As a Senior Consultant and Product Manager in the Presales team, his specialized consultation expertise lies in machine integration and in the design and implementation of consistent tool circulation. He has more than 25 years' experience in digital data management across the entire production environment. Many TDM customers benefit from this extensive practical experience in the context of his consulting work.

Knowledge:

- TDM Shopfloor Manager in connection with the machine
- Application cases and options with Web Clients
- Tool data from presetting to the machine

Title

- Shopfloor Management: What Are the Success Factors for an Efficient Tool Circulation?

Focus/ Target Group

- New and existing customers
- Users and decision makers

Duration

- 60 minutes

Speaker: Volker Schwegler

Focal Points/ Contents

Machine downtimes often have tool-related causes: Incorrectly assembled or unavailable tools, missing information regarding tool requirements, inconsistent processes and lack of data support. This webinar will show you how you can organize tools optimally using Shopfloor Manager, and which advantages this brings you:

- Shopfloor Manager: What is the software capable of and what are its suitable uses?
- Tool circulation stations: This is how stations and processes are set up in the software
- Machine integration: Which systems can be integrated and how does the data flow work?
- Use case: A successfully organized tool circulation using a practical example
- Benefits of and insight into Shopfloor Manager
