

Speakers:

Jean-Paul Seuren and Mathias Johansson

Profile

Jean-Paul Seuren (Managing Director, TDM Systems)

Jean-Paul Seuren has been part of the TDM Systems family since March 1, 2021. In his first few months with the company, as Vice President of Global Sales & Marketing, he accelerated international marketing and sales of TDM software. On October 10, 2021, he became CEO, thereby taking on the task of managing TDM Systems, and has been overseeing the software manufacturer's business ever since. Jean-Paul Seuren is a true sales professional in the software industry and decided on a career in sales relatively early on. As a qualified electronics engineer, before he eventually joined TDM Systems, he spent a long time at Vero Software, a company within Hexagon Manufacturing Intelligence, where he was responsible for sales and support as the Regional Director for EMEA. He is very familiar with the production industry and the challenges faced by machining companies and aims to use his expertise to promote new digital strategies with innovative products.

Mathias Johansson has led the Design & Planning Automation (DPA) division since June 2020. Under his leadership DPA has secured a strong position within the Computed Aided Manufacturing market through the acquisitions of Cambrio and CNC software (creators of Mastercam) the most widely used brand with an installed base of 280, 000 licenses. Prior to joining the DPA division in Sandvik Manufacturing Solutions, Mathias was CIO of Sandvik Coromant since 2017. Managing an organisation of around 800 employees covering development, architecture and portfolio management and undertaking a major IT transformation of the operating model to enable decentralization and agility. Mathias has been part of the Sandvik group since 2005, holding a number of posts at Sandvik Group, starting as a Competence Manager and moving up the ranks to his current role.

Title

- TDM Systems & Sandvik DPA: The integrative digital strategy for manufacturing companies from a single source

Target Group

- Existing customers
- New customers
- Decision makers
- Production managers
- TDM user

Duration

- 40 minutes

Focal Points/ Contents

Mathias Johansson and Jean-Paul Seuren will jointly open the TDM Day 2021. In his speech Mathias Johansson will present the corporate view of the SANDVIK Group and talk about the digital strategy, products and brands of the DPA business unit.

In his opening speech, Jean-Paul Seuren will talk about his vision for the future of tool management, the products that TDM Systems already offers, and which trends will prevail from TDM's point of view. Jean-Paul Seuren will also introduce the Sandvik "Design, Planning and Automation" department and show which offers and products machining companies can use to implement their digital strategies – from a single source.

- Introduction of Jean-Paul Seuren and welcome
- Vision of the future of tool management: Visions, trends and product developments
- Sandvik DPA business view and strategy: Presentation of the digital range for machining companies around the world
